## About This Game

**Road Fist** is a Beat 'em up style action game inspired by classic 80's / 90's fighting movies. The 3D movement provides a new panorama within the bilateral view (2D), adding more freedom and requiring a greater sense of direction from the player. The gameplay and difficulty is based on games like Dark Souls, where a stamina system is implemented and each enemy encountered can be deadly. The gloomy look comes accompanied by a stimulating, dense and varied soundtrack.

## THE LORE

Fear and chaos spread to the outskirts of the city. Volcan, the drug smuggler, is dominating peripheral neighborhoods with the goal of building his bloody empire at Road Fist. He will count on the help of his faithful subordinates. Among them are, assassins, mercenaries and also gangs of criminals. But not everything seems lost. Two skilled street fighters (Aris & Kyra) decided to join forces and stop Volcan's dirty plans once and for all. It's up to you to guide them through the dangerous streets of Road Fist, preventing more innocent lives from being lost. A long night is coming. Rain, mist, dust and blood will make it difficult. But do not forget, your fists will be your best allies.

This game has great graphics and reminds me of Streets of Rage. However, the actual gameplay is more like the 80s Nintendo game Kung Fu with simple punch and kick even down to the Menace Laugh when you lose. Unlike Streets of Rage and other popular Beat 'em ups this only has one life meter with no power ups like a game with a survival mode. There is not much in the way of blocking or countering the enemy attacks. So I wasn't able to make it further than 3 or 4 goons before I lost my life and got the Boss Laugh. Then it is start all over. Pretty frustrating. Then when I pressed Esc and got the Exit Menu, I wasn't able to choose a selection so I had to ctrl alt del to force close the program.

I do not recommend the hassle of this game and the feeling of lost promise.. Fair Price For A Side Scrolling Beat em Up, Game Pad Recommended!

You Take Control Of Either A Male Or Female Character Both Having The Same Abilities With No Obvious Increase To Speed Or Power;  
However Each Char Is Like It's Own Save So If You Had Beaten The First Three Levels On One Character You Better Believe You Will Have To Start Again On The Other.

Unlocks Include New Skin For Male Or Female Depending Who You Beat The Game With And New Levels As You Progress.  
AI Is 6/10 With Some Contantly Rolling Into A Wall And Hit Box Is Quite Pooh Alot Of The Time

Game Still Passed A Few Hours 8/10 Would Game Again

Check It Out on My Twitch RawrUFWU Before Buying If You Wonder What It's Like. I've only played this for a short time but I had fun whilst I did. Decent gameplay and graphics. It's definitely worth a try if you can get it on sale.. controller & game basically does not work hopefully refund does. The story of Road Fist is about a city that is corrupted by a drug smuggler Volcan and his 6 subordinates have taken parts of the city. You play as Aris is seeking to be the best fighter ever or Kyra who is seeking revenge join forces to take Volcan down.

This game is another example of the term 'microwave game' also its one of those 'Oh I want to make a beat 'em up because it's easy to do and I don't really have to add much' type of games. Well sometimes it's true, but not all the time. It's how you make it the game really. Road fist not only breaks rules of making a good beat 'em up it even break rules on game development also.

So about the 'Storyline' Menu. That's pretty much my fault I asked him in an email that he should put in that story lore that was on greenlight into the game. So he did and that's how he did it.

The control default layout is horrible. The punch is A and kick button is X, also B is roll and LB is block. When it comes to combos, you only have is 3 kicks and 3 punches, so don't expect to be all fancy with this game and speaking of fanciness there is no special move in this game at all.

When it comes to gameplay the gamedev should've gotten someone to 'playtest' his game. The pause feature doesn't pause the game, it just brings up a menu while the game is still active in the background. The bosses of the game are way unbalanced if you're about to beat the boss he somehow makes a comeback and kills you then you have to start the level all over again which gets pretty annoying.

The replayability has no value. You get 2 alt costumes and all of the levels are unlocked, but with the gameplay being horrible I never touched it again. I actually tried to like this game, I even gave the gamedev some slack and tried to help him with it, but since the gamedev thought it was a good idea to start a whole new project instead of fix Road Fist then I'm done with his game.

I rate this 3/10. The game looks very nice and I really want to like it but it is just impossibly hard. Maybe I am just terrible but I have been playing these types of games for over 20 years without this much trouble. barley can defeat the first 10 enemies. Finishing the first level will never happen as i always get destroyed.
